

Insegnamento: **Lingua Inglese**
English for Biologists

Docente

Anno 2° anno

Corso di studi Corso di laurea in Scienze Biologiche

Tipologia Altre Attività

Crediti 4

Anno Accademico

Periodo didattico Primo semestre

Propedeuticità Nessuna

Frequenza Fortemente consigliata

Modalità di esame Prova scritta e/o orale

Sede Polo Scientifico, Via Vivaldi 43 – Caserta – DISTABIF

Organizzazione della didattica Lezioni frontali

Obiettivi formativi Scientific English: An introduction to the organization, processes of science and interdependence of scientists. Emphasis is on understanding the methodology of scientific writing. Consideration is given to interpreting studies, and distinguishing reviews from studies

Prerequisiti

Contenuti del corso This is a comprehensive study of English for the competitive environment that scientists face. In this course, we will move from brain centres that govern language and second languages to English grammar and special syntax necessary to write for scientific publication, interpret scientific papers, deliver talks and present posters at scientific meetings. Throughout the course we'll touch upon the scientific methods and practices, both historic and current, that have led to our understanding of living organisms.
